

MSA AirMAXX eXXtreme

750012004

This high-quality SCBA provides comfortable, outstanding respiratory protection. Ruggedly reliable and flexible, it's a popular choice for a wide range of maintenance or rescue operations, including firefighting. Designed to reduce stress and fatigue, the ergonomically designed and optimally balanced AirMaXX backplate is adjustable to fit all body sizes. The continuous exposure to flames and heat from recurring hard training takes an especially hard toll on equipment. The eXXtreme preset utilizes special materials to reduce maintenance and cost of ownership of critical components that would otherwise require frequent replacement in such extreme applications. Trainers and others who work in repeated high-heat and flame circumstances choose eXXtreme.
